EXPERIENCE

eToro May 2024 - Present
Senior Front-end Developer *Tbilisi, Georgia*

- Improving and maintaining one of the world's leading broker platforms.
- Working back-to-back with designers, product managers, and analysts to deliver new features.
- Delivering impactful A/B tests, neatly measured with analytics.
- Developing extensible infra libraries used throughout the whole project.
- Working with Cordova to deliver an efficient native application.
- Writing internal documentation for library usage and maintenance.

Payever October 2022 - January 2023
Front-end Developer *Remote*

- Maintained CommerceOS, a monolithic e-commerce platform, across several apps simultaneously.
- Documented the entire project architecture for the engineering team.

IT Academy STEP September 2021 - September 2024
Lecturer *Tbilisi, Georgia*

- Taught front-end fundamentals: HTML, CSS, SCSS, JavaScript, Angular, and RxJS.
- Worked closely with management to improve the teaching process.
- Completely revamped the front-end syllabus based on modern technology trends and demands.

Freelancing May 2021 - May 2024
Web Developer *Remote*

- Delivered and maintained full-stack software for clients in Georgia.

NOTABLE PROJECTS

- Iswavle - A Georgian MDN alternative with a built-in code editor, built with Angular SSR.
- EverREST - A free REST API that students use to build real front-ends. NestJS, MongoDB.
- MirrorTab - Chrome extension that mirrors interactions from one tab to many in real time.
- Steam Idler - Self-hosted Nx monorepo with domain-layered Angular and NestJS libraries.
